EAN 4016032318385

USB 3.0 to Gigabit Ethernet Adapter USB-A Male, 10/100/1000 Mbps, USB 3.0

With speeds of up to 5 Gbit/s, USB 3.0 is quickly becoming the new standard in data transfer technology for PCs and laptops. Current computers usually only have 10/100 Ethernet connections, while Macbooks Air, Ultrabooks™, subnotebooks etc. no longer have any Ethernet connections. Existing USB 2.0 Gigabit Ethernet adapters are limited by the USB 2.0 standard to a maximum data transfer speed of 480 Mbps, while our DIGITUS® Gigabit Ethernet USB 3.0 adapter achieves speeds of 1000 Mbps. Thanks to its low power consumption of 200 mA, the adapter can also be used with a Macbook Pro and Macbook Air without any problems. Also suitable for compatible games consoles without an RJ45 socket.

Adds an RJ-45 network connection to ultrabooks, netbooks, notebooks, PCs, Macbooks Pro and Macbooks Air

- Compatible with the USB 3.0 specification, downwards compatible with USB 2.0 and USB 1.1
